Our Vision

Florim crea bellezza che resta.

"Il tempo è nostro amico"
è il principio che guida il nostro modo di pensare e di fare.
Perché è nel tempo che la qualità si riconosce,
la materia acquista significato e il progetto diffonde il proprio valore.
Non realizziamo solo superfici.

Diamo vita a un sistema completo per l'architettura, l'interior design e l'arredo.

Da oltre 60 anni, sotto la guida della Famiglia Lucchese, trasformiamo il saper fare italiano in superfici di alta gamma riconosciute nel mondo.
Un patrimonio vivo, alimentato dalla sensibilità per la bellezza, dalla competenza delle persone e dalla ricerca continua, guidato da una responsabilità concreta verso le persone, i territori e le risorse da cui dipendiamo.

Creiamo una bellezza fatta per restare.
Per dare identità al progetto. E valore a chi lo vive.
Nel tempo.

"Time is on our side"
is the principle that shapes the way we think and the way we work.
Because it is over time that quality reveals itself, materials gain meaning,
and design proves its lasting value.
We don't simply create surfaces.

We bring to life a complete system for architecture,
interior design and furnishings.

For over 60 years, under the leadership of the Lucchese family,
we have transformed Italian expertise and craftsmanship into high-end surfaces recognised around the world.
A living legacy, nurtured by a sensitivity to beauty, the expertise of our people and a constant drive for research and innovation — all guided by a tangible sense of responsibility towards people, the places we belong to, and the resources we depend on.

We create beauty made to last.
To give every project a distinctive identity.
And lasting value to those who experience it.
Over time.

GLAM LUXE

Luxury design

Superfici dalla forte identità, profonde e ricche di dettagli definiscono **Glam Luxe**, la collezione che interpreta il fascino del marmo contemporaneo in cui immagine e materia diventano un unico linguaggio. Venature, cromie e dettagli acquistano profondità, mentre percezione visiva e sensibilità tattile convergono in un'esperienza perfettamente integrata. Dodici interpretazioni di materia e colore compongono un racconto che attraversa marmi luminosi, brecce dal carattere scenografico e pietre dall'espressione più essenziale e architettonica. Due spessori, differenti finiture e due strutture decorative ampliano ulteriormente le possibilità compositive della collezione. Le strutture tridimensionali **Groove** e **Harmonic** introducono una nuova componente estetica: il rilievo entra in relazione con la luce e con l'orientamento della posa, trasformando la superficie in un elemento architettonico dinamico e sempre mutevole.

*Surfaces with a strong identity, deep and rich in details define **Glam Luxe**, the collection that interprets the allure of contemporary marble, where image and material become a single language. Veining, colors, and details acquire depth, while visual perception and tactile sensitivity converge into a perfectly integrated experience. Twelve interpretations of material and color compose a narrative that spans luminous marbles, breccias with a scenographic character, and stones with a more essential and architectural expression. Two thicknesses, different finishes, and two decorative structures further expand the collection's compositional possibilities. The three-dimensional structures **Groove** and **Harmonic** introduce a new aesthetic component: the relief interacts with light and the orientation of the installation, transforming the surface into a dynamic and ever-changing architectural element.*

*Des surfaces à la forte identité, profondes et riches en détails définissent **Glam Luxe**, la collection qui interprète le charme du marbre contemporain, où l'immagine et la matière deviennent un seul et même langage. Les veinures, les couleurs et les détails gagnent en profondeur, tandis que la perception visuelle et la sensibilité tactile convergent vers une expérience parfaitement intégrée. Douze interprétations de matière et de couleur composent un récit qui traverse des marbres lumineux, des brèches au caractère scénographique et des pierres à l'expression plus essentielle et architecturale.Deux épaisseurs, différentes finitions et deux structures décoratives élargissent encore les possibilités de composition de la collection. Les structures tridimensionnelles **Groove** et **Harmonic** introduisent une nouvelle composante esthétique : le relief entre en relation avec la lumière et avec l'orientation de la pose, transformant la surface en un élément architectural dynamique et en constante évolution.*

*Oberflächen mit starker Identität, tiefgründig und detailreich definieren **Glam Luxe** – jene Kollektion, die die Faszination des zeitgenössischen Marmors interpretiert, in der Bild und Materie zu einer einzigen Sprache verschmelzen. Maserungen, Farbgebungen und Details gewinnen an Tiefe, während visuelle Wahrnehmung und taktile Sensibilität in einer perfekt integrierten Erfahrung zusammenlaufen.Zwölf Interpretationen von Material und Farbe bilden eine Erzählung, die von leuchtendem Marmor über Brüche von spektakulärem Charakter bis hin zu Steinen von eher essenziellem und architektonischem Ausdruck reicht. Zwei Stärken, unterschiedliche Oberflächenausführungen und zwei dekorative Strukturen erweitern die kompositorischen Möglichkeiten der Kollektion nochmals.Die dreidimensionalen Strukturen **Groove** und **Harmonic** führen eine neue ästhetische Komponente ein: Das Relief tritt in Beziehung zum Licht und zur Ausrichtung der Verlegung, wodurch sich die Oberfläche in ein dynamisches und sich ständig veränderndes architektonisches Element verwandelt.*

*Superficies con una fuerte identidad, profundas y ricas en detalles definen **Glam Luxe**, la colección que interpreta el encanto del mármol contemporáneo, donde imagen y materia se convierten en un único lenguaje. Vetas, cromatismos y detalles adquieren profundidad, mientras que la percepción visual y la sensibilidad táctil convergen en una experiencia perfectamente integrada. Doce interpretaciones de materia y color componen un relato que recorre mármoles luminosos, brechas de carácter escenográfico y piedras de expresión más esencial y arquitectónica. Dos espesores, diferentes acabados y dos estructuras decorativas amplían aún más las posibilidades compositivas de la colección. Las estructuras tridimensionales **Groove** y **Harmonic** introducen un nuevo componente estético: el relieve interactúa con la luz y con la orientación de la colocación, transformando la superficie en un elemento arquitectónico dinámico y siempre cambiante.*
